Emīls Bernhards

Enschede, Netherlands | +37127104444 | bernhardsemils@gmail.com | Github | Portfolio

Skills

Languages: Javascript, Typescript, Node.js, SASS, CSS, and some experience with Java, Python.

Libraries: React.js, Redux, Next.js, Koa.js, Express.js, Mocha.js, Chai.js.

Tools: Git, Docker, SQLite, MongoDB, PostgreSQL, Babel, Webpack, Traefik, Nginx.

Experience

Student assistant at University of Twente   May 2021 - Present
- Helped maintain a geospatial data analysis platform. It is a Docker-based JupyterHub dynamically serving Jupyter Notebooks.
- Wrote user manuals for the platform and converted them into one big Sphinx-based documentation.
- Planned a multi GPU-rig for machine learning purposes.

Projects

Rainbow tracker
Elaborate time tracker that facilitates recording every 15 minutes of your life using user defined categories and activities. Includes a Typescript written React.js frontend and a Typescript written Koa.js REST API backend.

Batavierenrace app
Android application developed for the Batavierenrace relay race. The app is meant to simplify and improve the participant experience by features such as l live chat with volunteers, overview of the whole race route as well as individual routes, and more. Written with React Native and Firebase backend.
